FOR IMMEDIATE RELEASE

Pyro AV Announces Capture Express USB Video Capture

Easily Capture and Convert Video from Any Source

CERRITOS, Calif. (February 18, 2009) - Pyro AV® (www.pyroav.com) today announced that it is now shipping its Capture Express USB video capture solution which allows you to capture video as well as still frames from your home videos. Leveraging their experience in media conversion solutions for consumers and professionals, Capture Express USB is designed to extend the lives of old analog videos, converting them to DVD and other digital formats.

"Video tapes have a short life span," explains Alfred Bantug, Pyro AV Director of Sales. "With so many precious moments still trapped on tape, our new Capture Express USB gives consumers an easy way to transfer and preserve their videos on DVD, and even share them on websites like YouTube and Facebook."

Easy to install, the Capture Express USB connects to a computer via hi-speed USB 2.0, while connecting to VCRs, camcorders or any other video source via composite (RCA) video or S-video and stereo left and right RCA audio connectors. Once installed, the included ArcSoft TotalMedia application gives consumers the tools they need to capture their videos, edit out unwanted parts and then archive the video onto DVD or export the video to their Apple iPod or other portable media player, preserving the videos for eternity.

Pricing and Availability

Capture Express USB (PVC-198) is now shipping and is available through Pyro AV's network of retailers and online dealers, each with an MSRP of \$59.95. A total solution, Capture Express USB includes the Capture Express USB video capture device, AV cables, a CD containing device drivers and ArcSoft TotalMedia, a quick installation guide as well as Pyro AV's 2-year warranty.

About Pyro AV
